# Dear Customer

**For more than 25 years we have been studying the specifics of the harmful effects in different types of industry and provide our Clients with effective, reliable and comfortable protection.**

We are convinced that any workplace is unique by the variety of harmful factors (mechanical, chemical, thermal etc...), the type of work performed, its intensity and, personally, the professional requirements of the Wearer himself. To do his work, the Wearer will possibly need the space for the hand tools in the pockets or additional knees protection...

This is the initial basis for inventing the work clothing, which will not only protect the Wearer, but also help to perform the work qualitatively and comfortably.

That's why our strategy lays on flexible, individual and professional work with each of our Clients.

We analyze the working conditions, exposure factors and individual wishes, then finally present the solutions and possible options for choosing the proper protection...

Our experience and constant study of the effective technologies used in materials and production will ensure the high functionality and the long-life reliability of our products.

## We offer solutions

# IN CONSTANT RESEARCH

**F**or over 25 years the group of designers and technologists from «TORNADO» together with the Safety Engineers from various industries have been forming the range of manufactured workwear.

The specifics of work in different industries provide an inexhaustible source of ideas and solutions in creating not only efficient protection, but also a comfortable and reliable Assistant in serious work performance.

«TORNADO» constantly updates the Product Assortment, delivering new features, benefits and improvements for various types of work: from low intensity to tough work with high mechanical, chemical or temperature exposures.

Special attention is paid to the reliability of the garment gear: buttons, zippers, snaps, threads, etc.

The stability of the fabrics` properties on washing cycles and ease of maintenance are also taken into account.

TORNADO.KIEV.UA

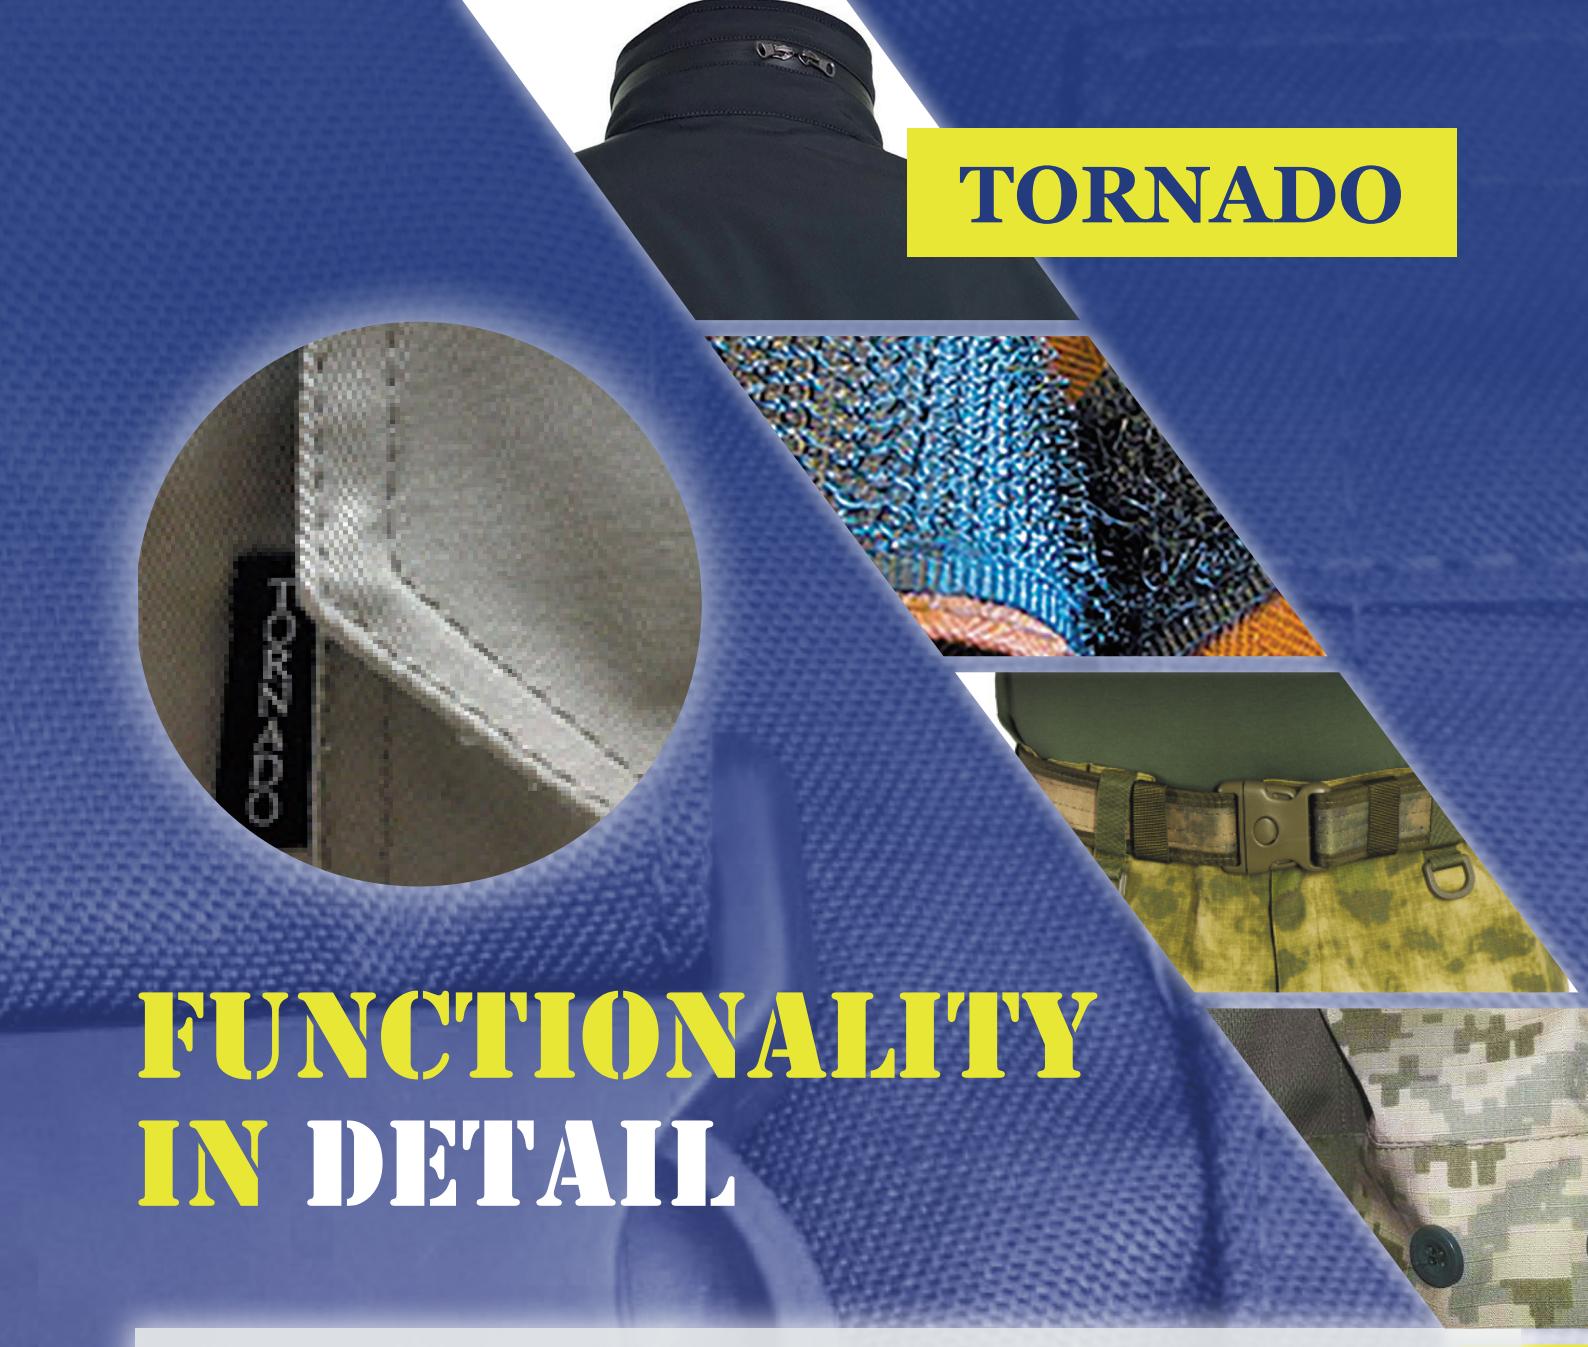

**We provide our Clients with  
various types of workwear:**

- jackets, suits, trousers, bib overalls, robes;
- insulated workwear (high/low temperatures);
- Special Purpose Garments for works in:

- welding;  
- emergency services;  
- military;

- high visibility;

## FUNCTIONALITY IN DETAIL

The garment consists of many small and often hidden parts, each of which contributes to the product its reliability, protective parameters and its own special appearance.

The constant study of new technologies in materials and accessories allows us to enclose to the product some additional benefits in functional characteristics and to make it comfortable in any workplace and in any weather.

Initially we create the prototype to be considered by the group of designers and technologists.

When using new fabrics, we test the prototype for resistance to washing exposure. Requirements to the fabrics – mech load

strength, hygroscopicity and ease of care. We conduct tests in the real working conditions of our regular Customers. The tested model is placed in different tough exposures and work intensity.

We get valuable opinions, wishes of End Users, then we review the functionality or design of the model.

Finally, the model is open for sale and is annually supplied to our Clients with hundreds of thousands per year.

## PERSONOLISE YOUR WORKWARE

We offer Embellishment Services, which gives You a quick and ease way to personalize Your Corporate WorkWear.

Technologies available: Embroidery, Heat Sealing And Screen Printing
